EXPERIENCE

Work as a Web Developer

I have created a clone of my university website with full functionality
This project has the various features like

- It can store the data of the students
- It can automatically store the Email addresses of every new client
- It can serve the various new web pages and portals for the students
- It is a **Fully Responsive Website** (smoothly works on every device like smartphones, laptops, tablets, iPhones, etc .)

Work as an E-mail Marketer

I also work as an E-mail Marketer

I did Email marketing as a job at a software house near Fun Duniya

I Know the various strategies of email marketing and spend a good time in this field

"In Email marketing, we have targeted the USA client and offering the service of House Constructions and various services according to construction"

Teaching

I also work as a Teacher in my college to teach students Programming Fundamental of C++ language and other Computer subjects
